

Frontend Developer with 2 years of experience
22 years old, Bachelor of Engineering
Gomel, Belarus | Ready for relocation

Nov 2021 - Nov 2022
1 year

Military Service

🌳 Conscription
You'll probably ask why I didn't work for a whole year
Responsibilities:
- do this
- don't do that

Latest Projects:

July 2021 - Oct 2021
4 months

Frontend React Developer

🏢 IBA
Full-time employment. English only.
The client had a government website full of services for a large city. Every business or individual user can i.e. issue or modify a license using an easy to use UI in just about 6 minutes instead of going to the office and waiting in line, etc.
Responsibilities:
- Frontend developing (using internal IDE based on React/Redux + TS)
- Extending business logic
- Investigating and fixing bugs
- Daily Scrum meetings in English
Tech Stack:
TypeScript, React.js, Redux, Git (GitLab), Jira, Confluence.

Apr 2021 - Jun 2021

Frontend React Developer

🏢 IBA feat. Visual Flow
Part-time employment. At first - internal project.
Visual Flow is a low code ETL solution designed for effective data manipulation via convenient and user-friendly interface. The tool can integrate data from different sources (DB2, COS, Elastic Search), perform data processing and transformation, leverage metadata for analysis and maintenance.
Responsibilities:
- Frontend developing with React.js and Redux
- Extending business logic
- Investigating and fixing bugs
- Enhancing code readability and reducing code smells
- Daily Scrum meetings
Tech Stack:
JavaScript, React.js, Redux, HTML5, CSS3, Git (GitLab, GitHub), Jira, Confluence, Swagger.

Dec 2020 - Apr 2021
5 months

Fullstack (MERN) Developer

🎓 University Project - Graduate Work
Careers tab for a company website.
This project is about careers (vacancies) tab on a company website. There are 2 types of access in this project: read-only access for everyone, and full access for administrators. Everyone can see the list of careers. Administrators can add, edit, and remove careers from the database using admin panel on the website.
Responsibilities:
- Application Design
- Frontend developing with React.js, Context API, TinyMCE
- Backend developing with Node.js, MongoDB, Express.js
Tech Stack:
JavaScript, React.js, HTML5, CSS3, Node.js, MongoDB, Express.js, JWT, bcrypt.js, TinyMCE.

Courses/Trainings:

Dec 2019 - Mar 2021
1 year 4 months

Frontend/JS Trainee

🏢 IBA
Professional training on internal projects by mentors - employees of the company
Goals Achieved:
- Learned fundamentals of React.js, Redux, TypeScript, Unit-testing, Angular, Node.js
- Learned advanced logic of Git, JavaScript (ECMAScript 5+)
- Built some frontend projects based on SRS

Apr 2019 - Aug 2019
5 months

C# .NET Trainee

🏢 EPAM Systems
Internship
Goals Achieved:
- Built a simple MVC project based on SRS
- Realized that JavaScript is everywhere, and I need to know it

Check some of my pet projects hosted on GitHub - [trainymonked.github.io](https://github.com/trainymonked)
