Latest Projects:

Dec 2023 - Dec 2023
2 weeks

Music Next

Music Next is a Spotify-alike web app that allows you to store and listen to your own music. You can listen to the songs, add them to your Liked Songs playlist, or upload your own songs. The user has to be logged in and has to have a subscription, which can be bought via Stripe.

Responsibilities:
- Front-end developing with React.js, Tailwind CSS, TypeScript
- Back-end developing with Next.js, Supabase (PostgreSQL)

Tech Stack:
Next.js, TypeScript, React, Tailwind CSS, Supabase (PostgreSQL), Git (GitHub), Vercel, Auth UI, Stripe.

Jul 2023 - Jul 2023
2 weeks

ChatBot

ChatBot is a Telegram bot which uses OpenAI API to talk to ChatGPT.
Features are: users white-list, suggestions, etc.

Responsibilities:
- Back-end developing with Node.js, JavaScript

Tech Stack:
JavaScript, Node.js, Express.js, OpenAI API, Telegram Bot API, Git (GitHub), Render.

Apr 2023 - May 2023
2 months

Reviews

Reviews is a kind of IMDB clone that I created as a task.
You can sign in and then add reviews to different Movies/TV Shows/Games and rate them. Or you can add another Movie/TV Show/Game if it doesn't exist.

Responsibilities:
- Front-end developing with React.js, Material UI, TypeScript
- Back-end developing with Next.js, Prisma ORM (PostgreSQL)

Tech Stack:
Next.js, TypeScript, React, Material UI, Prisma ORM (PostgreSQL), Git (GitHub), Vercel, NextAuth.js.

Jan 2023 - Jun 2023
6 months

Fancy Todo

Fancy Todo is not just to-do CRUD app. This is a schedule to-do app with a lot of features. The features are, e.g.: adding, editing, marking as done, deleting todos; custom categories, user authorization, dragging, keyboard navigation, use of reCAPTCHA, etc.

Responsibilities:
- Application Design
- Front-end developing with React.js, Context API, Material UI
- Back-end developing with Node.js, MongoDB, Express.js

Tech Stack:
MERN, JavaScript, Context API, Material UI, Git (GitHub), GitHub Pages, JWT, bcrypt.js.

Courses/Trainings:

Dec 2019 - Jan 2021
1 year 2 months
