Latest Projects:

Apr 2023 - May 2023 2 months	**Reviews** Reviews is a kind of IMDB clone that I created as a task. You can sign in and then add reviews to different Movies/TV Shows/Games and rate them. Or you can add another Movie/TV Show/Game if it doesn't exist. **Responsibilities:** - Front-end developing with React.js, Material UI, TypeScript - Back-end developing with Next.js, Prisma ORM (PostgreSQL) - Investigating and fixing bugs **Tech Stack:** Next.js, TypeScript, React, Material UI, Prisma ORM (PostgreSQL), Git (GitHub), Vercel, NextAuth.js.
Jan 2023 - Jun 2023 6 months	**Fancy Todo** Fancy Todo is not just to-do CRUD app. This is a schedule to-do app with a lot of features. The features are, e.g.: adding, editing, marking as done, deleting todos; custom categories, user authorization, dragging, keyboard navigation, use of reCAPTCHA, etc. **Responsibilities:** - Application Design - Front-end developing with React.js, Context API, Material UI - Back-end developing with Node.js, MongoDB, Express.js **Tech Stack:** **MERN**, JavaScript, Context API, Material UI, Git (GitHub), GitHub Pages, JWT, bcrypt.js.
Jun 2021 - Oct 2021 5 months	**"Super App" Website** The client had a government website full of services for a large city. Every business or individual user can i.e. issue or modify a license using an easy to use UI in just about 6 minutes instead of going to the office and waiting in line, etc. **Responsibilities:** - Front-end developing (using internal IDE based on React/Redux + TS) - Extending business logic - Investigating and fixing bugs - Daily Scrum meetings in English **Tech Stack:** TypeScript, React.js, Redux, Git (GitLab), Jira, Confluence.
Feb 2021 - May 2021 4 months	**Visual Flow** Visual Flow is a low code ETL solution designed for effective data manipulation via convenient and user-friendly interface. The tool can integrate data from different sources (DB2, COS, Elastic Search), perform data processing and transformation, leverage metadata for analysis and maintenance. **Responsibilities:** - Front-end developing with React.js and Redux - Extending business logic - Investigating and fixing bugs - Enhancing code readability and reducing code smells - Daily Scrum meetings **Tech Stack:** JavaScript, React.js, Redux, HTML5, CSS3, Git (GitLab, GitHub), Jira, Confluence, Swagger.

Courses/Trainings:

Dec 2019 - Jan 2021 1 year 2 months	**Front-end/JS Trainee** 🏢 IBA Professional training on internal projects by mentors - employees of the company **Goals Achieved:** - Learned fundamentals of React.js, Redux, TypeScript, Unit-testing, Angular, Node.js - Learned advanced logic of Git, JavaScript (ECMAScript 5+) - Built some front-end projects based on SRS
Apr 2019 - Aug 2019 5 months	**C# .NET Trainee** 🏢 EPAM Systems Internship **Goals Achieved:** - Built a simple MVC project based on SRS - Realized that JavaScript is everywhere, and I need to know it

Check some of my pet projects hosted on GitHub Pages - trainymonked.github.io
